Risk Assessment Eco House & Garden – Group Visits

Instructions

- Note the area/ activity being assessed
- Use the Risk Matrix to determine level of risk
- If a dangerous or hazardous substance is to be used, ensure you document key risk/s and list controls required or suggested by the Safety Data Sheet (SDS)
- If you identify any high-risk construction work, you require a Safe Work Method Statement (SWMS)
- Nominate a worker to lead the assessment and manage/monitor the implementation of controls
- Workers involved in developing and implementing the risk assessment must sign this risk assessment
- Induct relevant workers in this risk assessment and ensure all information is understood

Risk Assessment

Hazard/ Description of Risk <i>Identify the hazards that may cause harm to workers or the public.</i>	Inherent Consequence	Inherent Likelihood	Inherent Risk Rating	Control Measures <i>Use the hierarchy of controls to select the highest level of control measure/s available.
