

Project Engineer

- **Excellent employee benefits and salary on offer**
- **Great workplace culture with potential for flexible working hours**
- **Opportunities for professional development**

Kimbriki Environmental Enterprises Pty Ltd (KEE) operates an innovative waste and recycling centre on Sydney's northern beaches. The site receives over 330,000 tonnes of waste annually, with 80% being recycled. KEE is owned by Northern Beaches and Mosman Councils and actively promotes innovative and efficient services that reduce waste to landfill. Four on-site contractors provide supporting waste management services and actively collaborate with KEE staff to support these outcomes.

The Role

The successful candidate will provide a range of services to support the ongoing environmental compliance and best practice engineering standards at our unique Resource Recovery Centre and Landfill.

Key Responsibilities:

- Perform landfill gas emissions monitoring as required by the site Environmental Protection Licence and in accordance with the NSW EPA Landfill Guidelines.
- Perform dust monitoring.
- Conduct environmental inspections of the site, prepare reports and collate recommended corrective actions proposed by key stakeholders.
- Update site erosion and sediment controls plans, soil and water management plans, environmental management plans, PIRMP and other management plans as required.
- Reporting on the performance of the landfill gas collection system.
- Reporting on the performance of the leachate treatment plant and associated dams, pumps and pipelines.
- Conduct land surveys for various structures including temporary roads and access tracks, landfill bund walls, landfill gas collection infrastructure, landfill cells and stormwater structures.

The Successful Candidate

The successful candidate will be comfortable in both the office and on-site environments, engaging with a range of stakeholders from operational to management.

Essential

- Tertiary Qualifications in engineering or environmental science.
- Strong interest in environmental issues and the value of resource recovery and responsible waste management.
- Excellent written and oral communication skills, including ability to communicate with a range of stakeholders.
- Demonstrated administration skills.
- Ability to show initiative and versatility within a team environment.
- Demonstrated ability to organise and prioritise work to meet deadlines.
- Excellent computer skills, experience with Excel.
- Behaviour that positively demonstrates Kimbriki's values of respect, integrity, teamwork, excellence and responsibility.
- Current NSW Driver's Licence (Class C or above).

Desirable

- Experience with AutoCAD and / or 12D (3D modelling software).

On Offer

This is an exceptional opportunity to join a stable organisation with a great workplace culture and excellent employee benefits.
