

A.D.A.M

The 'key' to great composting

Aliveness

**Worms & Microscopic Organisms
are doing all the work!**

Love them!

Diversity

Variety is the spice of life!

The greater the diversity of ingredients,
the better the finished compost!

Aeration

Worms & Microscopic Organisms Breathe!

Mix the compost with the
'Compost Key' spiral,
as much as possible!

Moisture

**Keep the compost heap moist
all the time!**

It's a living thing!
